Horse and Mule Exports.

From Aug. 1, of last year to June of this year the United States export By Mrs. Janet McKenzie Hill, Editor of the Boston Cooking School Magazine ed 341,823 horses and mules. This is the number shown by the inspection This Jelly Roll is fast becoming very list of the Bureau of Animal Induspopular on account of the way it keeps iresh. With proper handling it should keep fresh a whole week, providing it lan't esten up in the meantane, for it is every hit as good as it looks.

33 try. Europe took 228,527 horses and 48,578 mules, and Canada 41,250 horses and 23,463 mules during those nine months. In March, April and May the exports of horses and mules to Europe were around 40,000 to 50, 000 a month, and the total experts to Europe and Canada were at the rate of 50,000 to 57,000 a month.

Great as these figures look when viewed by themselves, they can make only a gradual and slow impression n our supply of horses. The total so far is less than 2 per cent. Although the volume of exportation was still great through June and July, the rate of buying on foreign accounts has since been reduced and there may be less activity from now on. Cavalry horses play no great part in the slow moving hand to hand trench warfare on which European operations have been largely based this summer.
